DataExpert Technology Limited

A Leading IT security company

DataExpert has changed a lot during the past 10 years. But one thing it remains is always providing the best products and the most satisfying services for its customers.

From Duplicators to A Complex

Established in 2005 in Hong Kong, DataExpert started providing data recovery, digital forensic and data erasing services for customers. In 2006, it became a distributor of YEC, a renowned and trustworthy brand in Japan, for hard drive duplicators. Sticking to selling reliable products with high quality only, it then started distributing Atola data recovery tools and Orient degaussers in 2007, and ADC degaussers in 2008.

In 2012, DataExpert developed its first own product, the hard drive destroyer. This office-suiting convenient small machine has since brought us a lot of customer orders. Up till now, we are still improving its design to make it better and better.

Our Shenzhen branch, which was opened in 2012, is our important hub for mainland market. In 2014, we launched our Singapore branch with the hope to expand business to the wide world more rapidly and smoothly.

Today, we develop, manufacture or distribute a variety of professional products and services. While focused in IT security industry, we always try best to supply comprehensive options for our customers to meet their different needs.

Global Connection

As long as there is a chance to serve customers, we won't give up going there for business. Currently our global partnership covers a wide range with a focus in Asia. We deliver our own developed products to distant customers through resellers and distribute other suppliers' industry-leading products to various markets.

Keen to expand business, our experts and managements travel around the globe each year to attend expos and meet with industry professionals to seek deeper and wider cooperation. Responding to strong demands, they also travel frequently to deliver training courses for IT practitioners and law enforcement personnel in different countries.

"In the past few years, we've had a good relationship with DataExpert. We especially appreciate their teammates' great support. We would like to continue cooperating with DataExpert for good business in Korea."
— Mr. Sun Wooyoung
Hankilwit

Prospects

Step forward and never stop. The global market is changing every day, and so is technology. The road ahead is a mix of risks, challenges and opportunities. What we will do is keep trying our best to help customers build up proper practices for IT asset management and ensure 100% data security.

We only have one earth. DataExpert will continuously contribute to making our home planet a nicer, safer and sustainable place to live through our waste reduction solutions.
